Funding is limited. Vending Machine Controllers are provided on a first-come, first-served basis while supplies last. Controllers are not for use on machines containing perishable goods. This program is funded by California utility customers and administered by PG&E under the auspices of the California Public Utilities Commission.

Save energy when your customers are away with automatic vending machine controllers

Sign up for FREE while supplies last!

VendingMiser™ Controller

- Compatible with all types of coin-operated cold drink vending machines, except those containing perishable goods
- Uses a motion sensor to automatically power down the machine when the surrounding area is vacant and re-power the machine when a customer approaches
- Ensures that the product stays cold by monitoring the temperature and automatically re-powering the cooling system at one to three hour intervals, independent of sales

SnackMiser™ Controller

- Compatible with all types of coin-operated snack vending machines, except those containing perishable goods
- Uses a motion sensor to automatically power down the machine when the surrounding area is vacant and re-power the machine when a customer approaches

CoolerMiser™ Controller

- Compatible with all types of reach-in cold drink coolers, except those containing perishable goods
- Uses a motion sensor to automatically power down the machine when the surrounding area is vacant and re-power the machine when a customer approaches
- Ensures that the product stays cold by monitoring the temperature and automatically re-powering the cooling system at one to three hour intervals, independent of sales
